Summary

Software engineer with hands-on experience in full-stack web development and production systems, currently pursuing M.Tech. in Geoinformatics at IIT Kanpur. Building expertise at the intersection of spatial data, machine learning, and software engineering. Strong foundation in Python, C++, JavaScript, and React — complemented by growing skills in ML, GIS, and remote sensing. Seeking roles in software engineering or ML/Data Science where I can contribute technically and grow fast.

Education

Indian Institute of Technology (IIT) Kanpur

Kanpur, India

M.Tech. in Geoinformatics | Civil Engineering Department

2025 – Present

- Sem 1 coursework includes Probability and Statistics, Numerical Methods, Spatial Analysis, GPS & GNSS Technology, Remote Sensing, and Advanced Geoinformatics.
- Currently pursuing 2nd semester courses in Spatial Data Science and Photogrammetry, while auditing Computer Vision.
- Actively working toward a research thesis at the intersection of geospatial technology and machine learning.

Priyadarshini College of Engineering, Nagpur

Nagpur, India

B.Tech. in Computer Science and Engineering

2019 – 2023

- CGPA: 8.0/10 (overall across all four years).
- Final year project: **Fake Medicine Detection System using Blockchain** — a decentralised solution to verify drug authenticity and combat counterfeit pharmaceuticals using Ethereum smart contracts and a React frontend.
- Strong CS fundamentals in Data Structures, Algorithms, OOP, DBMS, and Computer Networks.

Experience

Software Engineer

Nagpur, India

ASP OL Media Pvt. Ltd. | Full-time

Apr 2024 – Oct 2024

- Engineered 2–3 production-ready HTML/CSS email templates daily, ensuring pixel-perfect rendering across Gmail, Outlook, Apple Mail, and mobile clients.
- Diagnosed and resolved mail server delivery failures and stuck queue issues, maintaining campaign uptime and reducing bounce rates.
- Worked in a cross-functional team under tight daily deadlines, taking full ownership of deliverables from development to deployment.

Frontend Developer Intern

Remote

DevKalp Technologies | React · Tailwind CSS · Agile

Apr 2023 – Sep 2023

- Built a hospital management dashboard using React and Tailwind CSS — enabling staff to view patient records, check doctor availability, and book appointments in real time.
- Developed responsive UI components for e-commerce client projects in a 4-member agile team with direct client communication and iterative feedback cycles.
- Gained production experience with Git workflows, component-level code reviews, and shipping features against real client deadlines.

Projects

Fake Medicine Detection using Blockchain | *Ethereum, Solidity, React, Web3.js*

B.Tech Final Year Project

- Designed a decentralised drug verification system on Ethereum, allowing patients and pharmacies to confirm medicine authenticity via smart contracts — addressing a real public health problem.
- Implemented the full stack: Solidity smart contracts, React-based frontend, and Web3.js integration for blockchain interaction.

Hospital Management Dashboard | *React, Tailwind CSS, Node.js*

DevKalp Technologies, 2023

- Built a full-featured React dashboard for a real hospital client — patient records, doctor scheduling, and appointment booking — delivered in a 4-member agile team with direct client involvement.

Personal Portfolio Website | *React, Tailwind CSS, Framer Motion, Vite*

Personal Project

- Designed and built a fully responsive portfolio with animated background, dark/light mode, typewriter effects, contact form (Formspree), and smooth scroll navigation.

Technical Skills

Languages: Python, C++, JavaScript, TypeScript, SQL, Solidity

Frontend: React, Tailwind CSS, HTML5, CSS3, Framer Motion, Web3.js

Backend: Node.js, Express.js, MongoDB, REST APIs

ML & Data: Scikit-learn, TensorFlow, NumPy, Pandas, Matplotlib, Jupyter Notebook, Google Colab

Geospatial: GIS, QGIS, MATLAB, Remote Sensing, GNSS, Google Earth Engine

Tools: Git, GitHub, Linux, AWS, VS Code

Achievements & Certifications

CodeChef 3-Star — Consistently rated 3-star; participated in multiple Long Challenges and Cook-offs, demonstrating strong problem-solving and algorithmic thinking.

IIT Kanpur M.Tech. Admission — Secured admission to one of India's most prestigious institutions through a highly competitive national-level selection process.

Udemy Certification in C++ — Completed a structured course covering core language fundamentals, OOP principles, and STL.
